TB Risk Screening: Yes to Other High Risk Questions

If a student answers yes to any of the other high risk screening questions, before coming to campus they will need to:

1. You must have a document which shows: TB skin test or a TB blood test with negative results.

   This test must be done WITHIN ONE YEAR PRIOR TO YOUR FIRST DATE OF ATTENDANCE AT UCSC.

Per consult with our local Public Health Department:

a. The likelihood of a false positive blood test is higher for students that received BCG. In instances where students received BCG and have a positive skin test between 10-14mm induration, we will accept a negative blood test (IGRA - Quantiferon or T-Spot) as proof of negative TB. This test must be done within the one year prior to the first date of UC attendance.

b. It is the UCSC Student Health Center standard to consider a TB skin test with results of 15mm or greater to be positive, even with a negative TB blood test and regardless of whether BCG was previously administered.

2. After you receive a current test, complete the 'TB Test Results' or 'TB Current Test Results' forms as available on this Health e-Messenger system (Home page/Forms)

3. Send a Secure Message with an uploaded picture of your test result

The deadline is Tuesday, August 15, 2017. Please complete this process before you get to campus to prevent future enrollment holds.

If you have any questions, please send a secure message to the Immunization Provider. Please allow 10 business days for response.

Here is what they need to fill out:

TB Test Results

Tuberculosis Testing Results

For students in high risk categories the UC requirement is proof of a negative TB Test (skin or blood) within one year prior to your UC first date of attendance.

TB Test Result and Date

**1. What were the results of your test TB skin or blood test?**

* Positive (for skin test <10 or greater mm induration)  * Negative (for skin test <10mm induration)

**What was the date of this test?**

NOTE: skin test results 5-mm induration with any of the following conditions are considered POSITIVE

* Human immunodeficiency virus (HIV) positive persons
* Recent contact of tuberculosis (TB) case patients
* Fibrocas changes on chest radiograph consistent with prior TB
* Patients with organ transplants and other immunosuppressed patients (receiving the equivalent of >15 mg/d of prednisone for 1 month or more)

Please notify the Immunization Clinician via Messages > new message if you meet any of these criteria

You must also upload a copy of your test result via the Immunizations/TB Upload tab on the homepage.

Technical Assistance

1. Make sure they have acknowledged the Privacy Practices. If they have not, please advise them to do so. This will allow them to get where they want to go within the secure messaging system.

2. If the student forgot their gold password remind them to follow the directions on the sign-on. They have to contact main IT. https://Cruzid.ucsc.edu/

3. All other system problems have them email student.health.it@ucsc.edu.
