Licorice tincture

What is it?

Licorice (Glycyrrhiza glabra) is a soothing anti-inflammatory herb. The active part of the plant is the root and has a long history of medicinal use, especially in Asia. This preparation may be used topically to help dry and heal oral and genital herpes and cold sores.

How much should I take?

This tincture may be used topically directly to the lesions multiple times throughout the day.

Is it safe?

Used topically, it may sting but is otherwise safe. Licorice tincture can be used orally for many other conditions but the amount and duration of use should be discussed with your provider or Pharmacist as there may be side effects on blood pressure or the adrenal glands.

Please consult your provider or the Pharmacist if you have further medical problems or concerns. We are dedicated to your health and wellbeing!
